Professional Summary

IT Specialist with 3+ years of experience across network operations, identity management (IAM), and secure data center environments. Skilled in high-stress incident triage, enterprise platform troubleshooting, and data integrity. Holds an active Public Trust Clearance.

Technical Skills

- **Infrastructure & Identity:** NOC operations, emergency hotline response, Cisco networking, ZScaler, VPN, Okta, Jamf, Microsoft 365, IAM auditing.
- **Systems & Automation:** Salesforce, ServiceNow, GoHighLevel CRM, Intune, Python, Java, Node.js, SQL, REST APIs.
- **Operating Systems:** Windows Ecosystem, macOS, Linux.

Professional Experience

Securitas | Data Center IAM Specialist | *May 2023 – June 2026*

- Managed user permissions and conducted rigorous access rights audits for technical personnel within a high-security Microsoft Datacenter.
- Enforced security compliance policies across restricted data center zones, server spaces, and critical physical environments.
- Monitored hardware inventory and logged facility security incidents using Kaseya and internal asset tracking platforms.

ABRB Consulting LLC | Information Technology Intern | *March 2026 – August 2026*

- Configured custom fields, access permissions, and automated workflows within a cloud-based CRM platform.
- Maintained database integrity by running data validation checks and resolving data inconsistencies across platforms.
- Authored platform configuration guides and analyzed system logs to deploy operational efficiency updates.

Amwell | Level 2 NOC Specialist | *June 2026 – Present*

- Manage priority emergency hotline coverage to rapidly triage, document, and resolve technical crises for network providers.
- Diagnose hardware, software, and configuration issues on a secure, HIPAA-compliant telehealth platform under pressure.
- Host live technical bridges with providers to isolate connectivity, application access, and localized system errors.
- Build detailed technical logs to escalate bugs to engineering teams and manage incident lifecycles via Salesforce and ServiceNow.
- Support technical workflows for secure government contracts while maintaining strict Public Trust compliance.

Technical Projects

Nexus Intel Lab | Lead Developer | github.com/JacobGrubbs/nexus-intel-lab

- Developed a threat intelligence app using Node.js and GPT-4o-Mini to automate IP reputation scoring and malicious actor profiling.
- Integrated external security REST APIs and structured a SQL database to log, index, and query historical threat data.

Education

- **Northern Virginia Community College** | Associate of Science in Information Technology
- **George Mason University** | Bachelor of Science in Information Technology | Concentration in Cybersecurity
