Motivated IT Support Specialist with 3+ years of experience in technical environments and infrastructure security. Committed to delivering seamless end-user support and maintaining operational efficiency. Proven expertise in Identity Access Management (IAM), troubleshooting Windows and macOS ecosystems, and leveraging Microsoft 365, Okta, and Jamf to ensure enterprise-grade connectivity and security compliance.

### WORK EXPERIENCE

#### **SECURITAS**, *DCJS Security*

03/2023 – Present

Chantilly, VA

- Manage Identity Access Management (IAM) protocols, configuring permissions and auditing access rights for Microsoft Datacenter personnel.
- Troubleshoot and enforce access control policies, ensuring hardware and facility security compliance for all onsite staff.
- Utilize Kaseya and internal tracking systems to document security incidents and maintain accurate asset inventory logs.
- Provide first-line technical support for connectivity and workstation access issues, facilitating onboarding and offboarding security compliance.

#### **CABELAS**, *Cashier*

01/2021 – 01/2022

Haymarket, VA

- Collaborated with team members to meet inventory management goals and maintain operational efficiency within a retail environment.
- Resolved customer service inquiries, utilizing soft skills to provide effective solutions and ensure a positive user experience.

### EDUCATION

**GEORGE MASON UNIVERSITY**, *Bachelors in IT/Concentration in Cybersecurity*

Present

**NORTHERN VIRGINIA COMMUNITY COLLEGE**, *Associates in Information Technology*

### TECHNICAL PROJECTS

#### **Nexus Intel Lab**, *Lead Developer*

- Engineered an AI driven threat intelligence platform using Node.js and GPT -4o-Mini to automate IP reputation scoring and malicious actor characterization
